Paychek Safeguard란 무엇인가요?

로컬 보호 장치로, 규율 규칙을 트레이딩 중 기술적 제약으로 적용합니다.

- Defines rules in the Windows software (Safeguard)
- The NinjaTrader addon applies / displays status in real time
- If a rule is breached → trading blocked (orders rejected when Blocking on)
- Runs locally (127.0.0.1) — the PC must remain on

두 구성 요소, 하나의 로컬 연결

1. Windows software

Safeguard UI: rule plan, capital, engage discipline, licence. Local HTTP server.

2. NinjaTrader 8 addon

Discipline window: Connected, OK / BLOCKED, counters, Sync zones, Blocking on.

3. Real-time connection

127.0.0.1:8080 · shared secret.
Without Safeguard open, there is no safeguard.

Windows software — status + plan rules

Addon NT — Connected / OK

Windows 키트 — 사용자 파일

1

2-Install-Addon.bat

Close NT → install the addon sources → reopen NT → Compile (F5).

2

3-Open-Safeguard.bat

Starts the local server + UI. The server remains active even if the UI is closed (STOP.bat to stop it).

3

NT → New → Paychek Safeguard

Discipline window → Connected → activate PAYC licence → Engage discipline.

4

4-Uninstall-Addon.bat

애드온 제거: NT를 닫음 → 4-Uninstall-Addon.bat 실행 → NT를 다시 열기 → F5.
